---

## **1. Introduction**

The Tarsh Consulting website uses cookies to distinguish you from other users of our website. This helps us to provide you with a good experience when you browse our website and also allows us to improve our site and services. By continuing to browse the website, you are agreeing to our use of cookies.

## **2. What is a cookie?**

Cookies are tiny files sent to your browser from a web server and are temporarily stored on your computer's hard drive to help deliver to you a better web experience. Most websites use cookies in one form or another. Cookies cannot be used to obtain information about files on your computer.

## **3. How you can control cookies**

3.1. By default, most browsers are initially set up to accept cookies. If you prefer, you can alter your web browser preferences, either to notify you when you have received a cookie, or to refuse to accept cookies. You can also delete any cookies that have already been sent.

3.2. If you choose not to accept cookies, you may not be able to use certain features on the Tarsh Consulting website.

## **4. Strictly necessary cookies**

The Tarsh Consulting website uses "session cookies" to maintain information about where you are on the Tarsh Consulting website and whether you have logged in to it. These cookies are deleted as soon as you close your browser. By way of example, the Tarsh Consulting website uses JSESSIONID. This cookie is used to identify you as a user between page loads. This allows us to remember certain settings, like which part of the Tarsh Consulting website you were using before you were asked to log in or register.

## **5. Functionality cookies**

The Tarsh Consulting website uses “functionality cookies”. These cookies are not required to operate the Tarsh Consulting website but can provide extra functionality for you. We will tell you if a feature will use cookies before you use it. By way of example, the Tarsh Consulting website uses ....USERID. If you ask us to “remember you” when you log into the Tarsh Consulting website, then we will send a cookie so that we know not to ask you next time.

## **6. Social network sharing cookies**

Some of our pages invite you to “share” them via social media sites like Facebook, Twitter, Google+ or LinkedIn. If you chose to use the ‘share this’ function, those sharing sites may set a cookie on your machine. You should consult that social media site’s terms and conditions before “sharing”.
